DESIGNING POLICY APPROACHES UNDER ARTICLE 6

Thursday, December 12, 2019
19:30 - 20:30

Hosted by the Nordic Council of Ministers, GGGI will be holding a side event titled "Designing Policy Approaches Under Article 6" at the Nordic COP 25 Pavilion on Thursday, December 12, 2019.

Funded by the Norwegian Ministry of Climate and Environment, the Global Green Growth Institute (GGGI) is leading a ground-breaking project on designing national policy approaches under the Paris Agreement Article 6, with a focus on developing policy approaches that could potentially generate Internationally Transferred Mitigation Outcomes (ITMOs). These policy approaches are aimed at being wider and more encompassing than the historic project-based carbon markets, creating transformational change through national impact, needed for Article 6 to help increase ambition and reach the 2 degrees goal.

GGGI works with its member and partner countries to support their work towards sustainable green growth and climate resilience. Embedded within government GGGI uses country led strategies such as NDCs and SDGs as a guide to achieve its goals. GGGI will help access climate finance in all its forms to help implement activities on the ground, pricing carbon and piloting international carbon transactions contributes to this stream of work.

This event will take the format of a brief presentation of the GGGI project, followed by a panel discussion on the issues that are being raised as discussions with countries progress, such as emission reduction ownership and corresponding adjustments. A Q&A session will then follow where the audience will have an opportunity to raise questions and share their experiences on the topic area.

TIME	ACTIVITY	SPEAKERS
19:30 - 19:45 (15min)	Presentation	Fenella Aouane – Principal Green Finance Specialist, GGGI
